

KOŚAA

Unlined: If you want to preserve the transparency of the natural material, you can keep it unlined.

Privacy Lining: The lining is an extra layer of fabric used to create privacy, protects the drapery material from the damaging effects of sunlight which, over time, might fade.

Blackout Lining: Blackout Lining blocks nearly 100% of the outside light from penetrating the drape.

Interlining: The Interlining is the layer of material between the primary fabric and the lining. The flannel is loosely woven to provide a greater insulating factor and adds dramatically to the fullness of your custom drapes.
