

KOŚAA

Before you select single panel or split panel, you need to identify if you want stationary decorative panel or a functional operable panel.

Single Panel: (Left, Right and Center) Single panel would be made exact to the width specified, the returns, fullness and overlaps will be considered by the workroom. You just need to specify the area you want to cover.

Split Panel: The specified width will be divided equally from the center. If you need varied sized panels for same window, you can order single panel individually specifying left center or right.

NOTE: Fullness is the fabric that is used to cover the width of your drapery track. We typically add 2.5 more fullness or pleats.
